Communication is Everything

86% of communication over the phone comes from tone of voice – using your voice effectively through the way you use inflection, pace and volume depends very much on the quality of the sound your headset microphone transmits to your listener.*

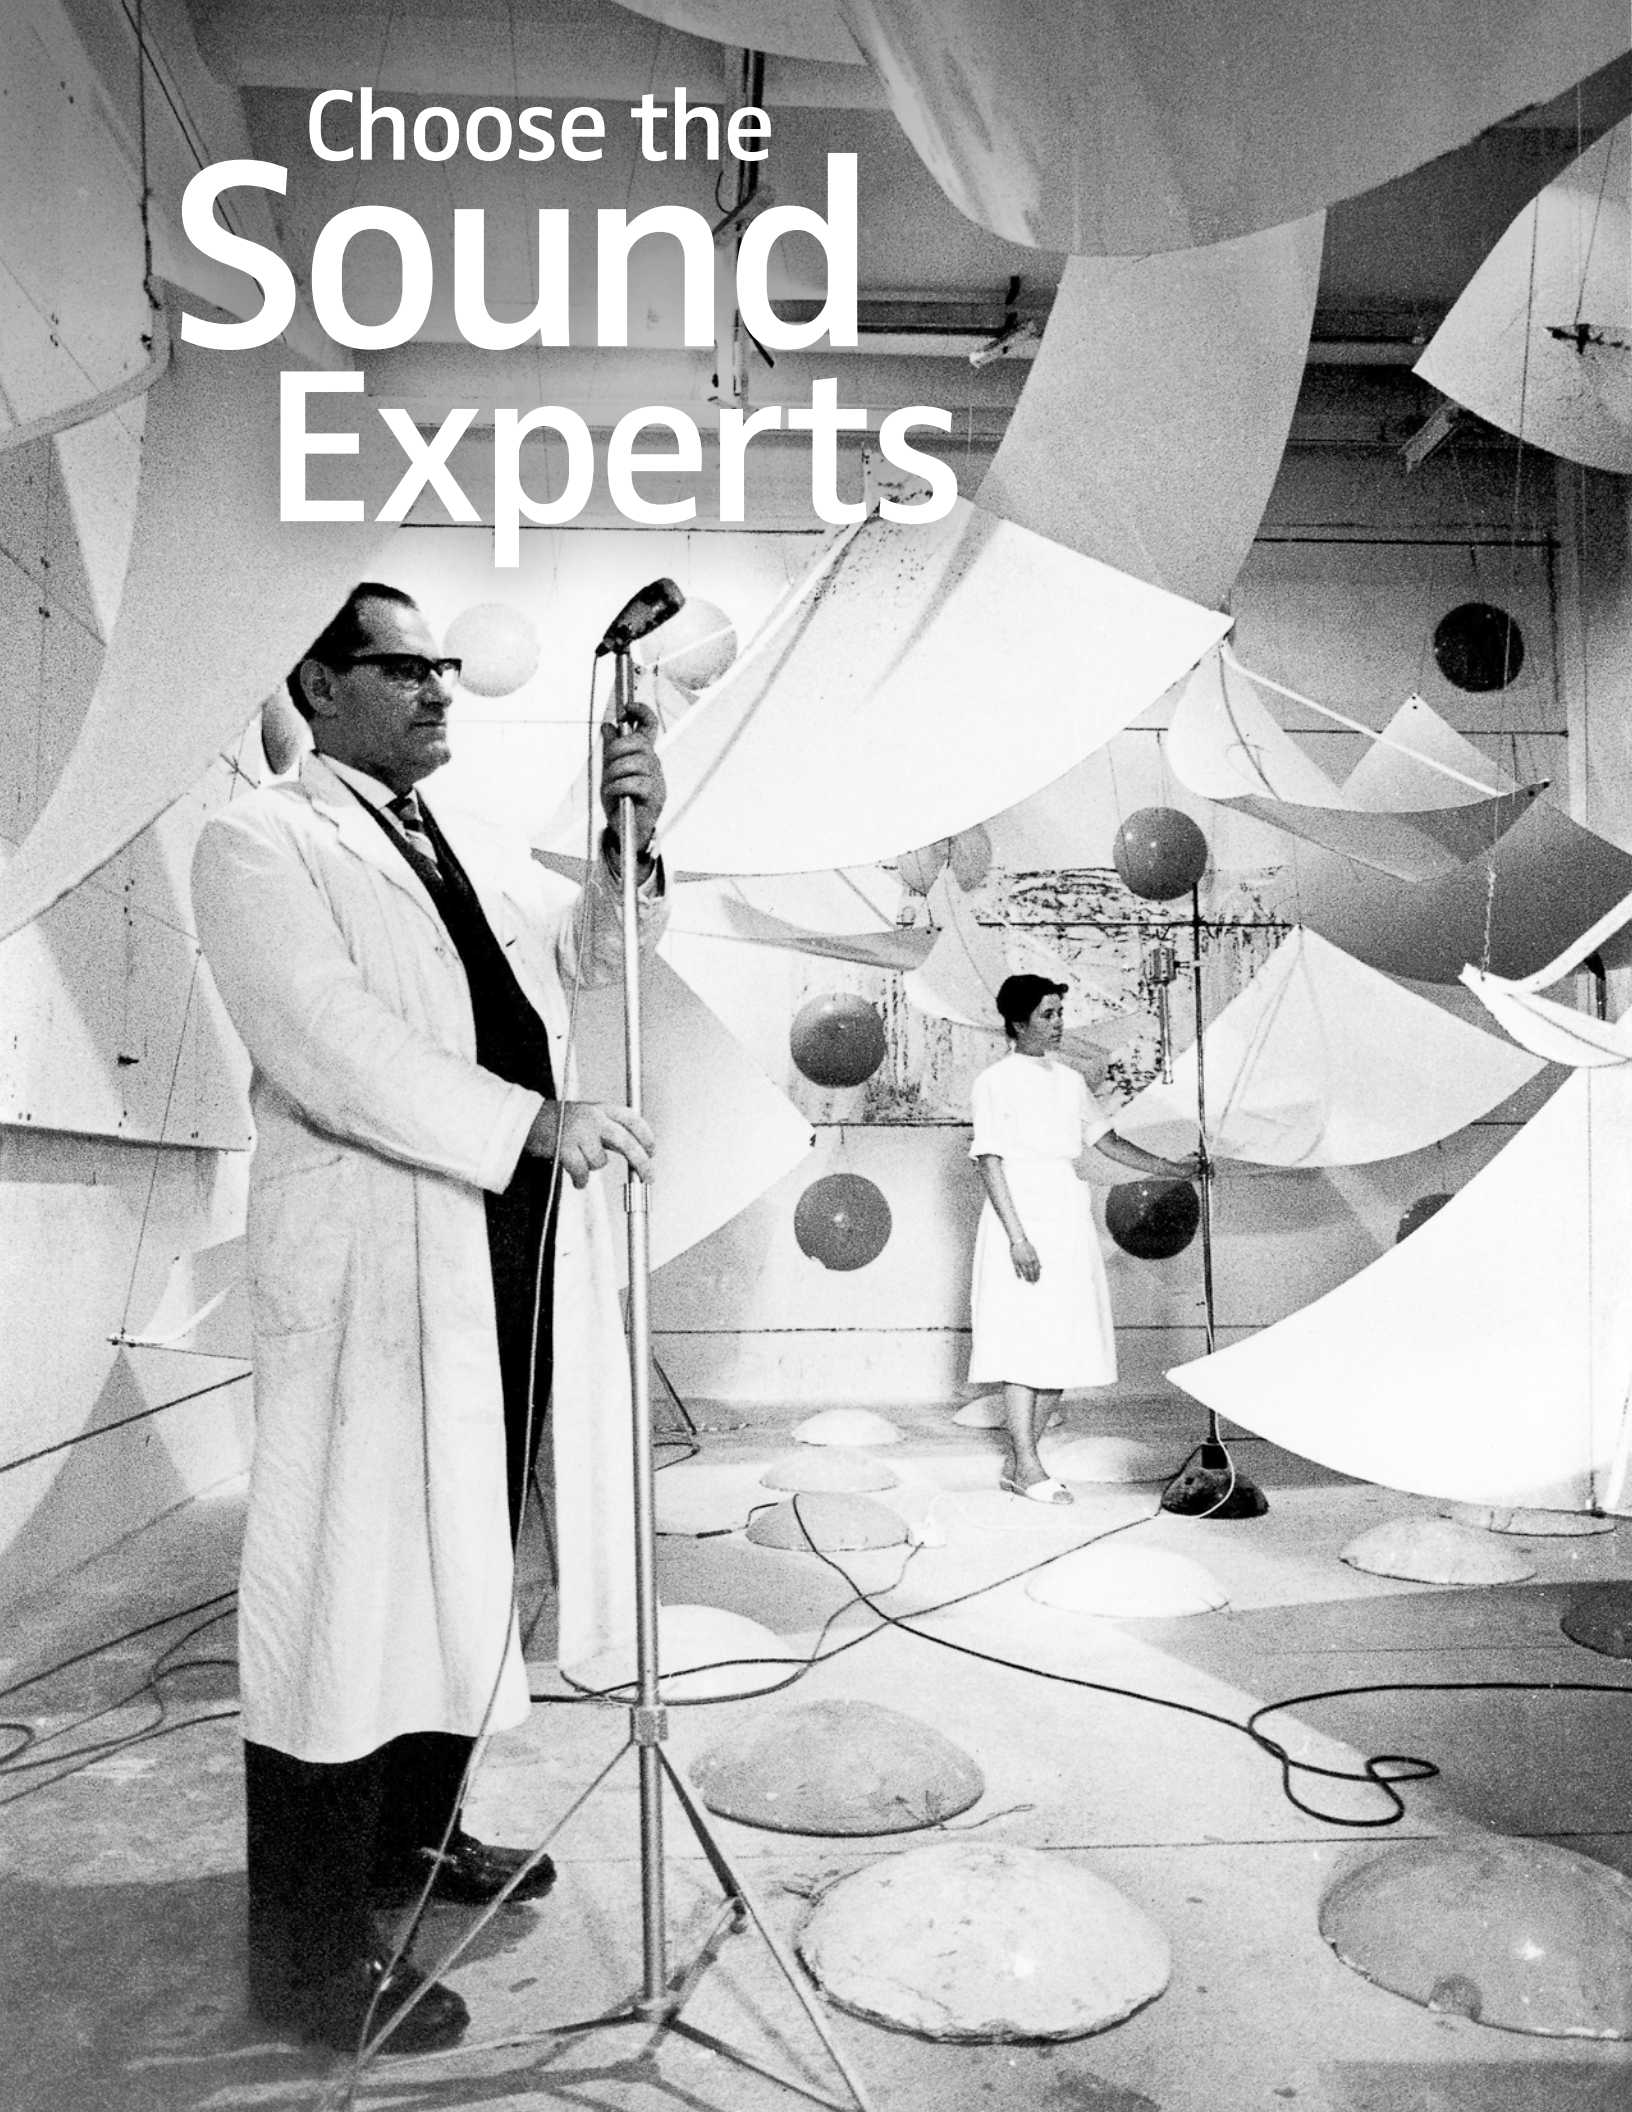

At Sennheiser, everything we do is about improving communication. Effective communication is vital to your company's success: it increases sales, improves brand perception, solves problems faster, and boosts performance and productivity. It can even create happier staff and customers. Communication is at the heart of all businesses.

That's why our headsets are designed to create the most natural, comfortable listening experience possible for everyone involved in the conversation. Enhancing and improving verbal communication is where our product solutions excel..

Choose the Sound Experts

YEARS

Sound leadership

For more than 70 years the name Sennheiser has been synonymous with the highest quality products across all areas of sound recording, transmission and reproduction. This expertise has enabled us to create a range of business headsets that make it easy for all participants in the discussion to focus fully on the conversation – even in noisy environments. Add Sennheiser Voice Clarity and experience audio quality like you’ve never experienced before.

Quality design

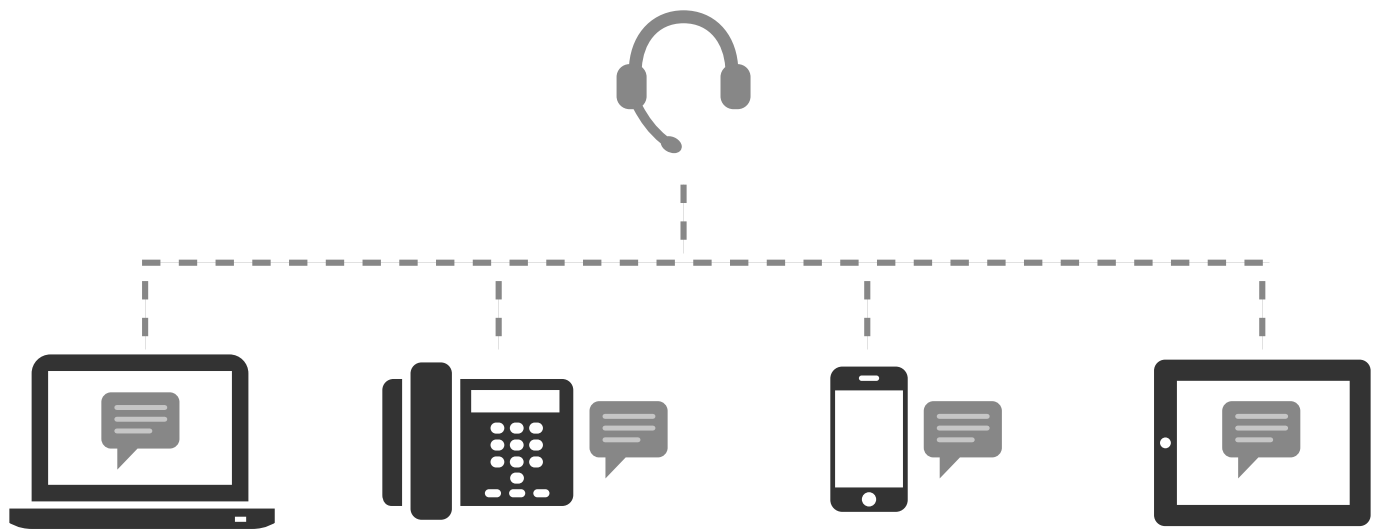

Every headset we create is designed to look as good as it sounds. This unique combination of form, function and quality has been recognized by many international award panels and millions of professional users around the world. There’s an unmistakable sense of excellence in the design of a Sennheiser headset, and the right choice of materials results in products that deliver years of dependable service.

User focus

Sennheiser headsets are designed for long use throughout the working day. That’s why we pay so much attention to comfort – from super soft ear pads to personalized fittings for varied wearing styles. Comfort is – of course - nothing without safety. For that reason, hearing protection is paramount in all our headsets. ActiveGard® technology provides defense from unexpected sound bursts, ensuring that your hearing is never at risk.

Experience Sennheiser

No matter how well we explain the features and benefits of our products, the only way to truly understand what makes Sennheiser unique is through your senses. That’s why we invite you to experience Sennheiser. Your senses will tell you what we can’t describe in words: This is how great sound feels.

Unified Communications

Moving towards a UC environment

A Unified Communications solution does precisely what the name indicates: it brings together a company's voice, text and video based communications under one integrated solution.

Chief among the advantages of a Unified Communications solution is: enhanced overall efficiency through increased productivity and mobility, resulting in a positive return on investment. The ability to view colleagues' availability status and send instant messages reduces unnecessary emails and missed calls to an absolute minimum.

Whether in the office, at a meeting, traveling, or working from home, Sennheiser offers a comprehensive range of quality wired and wireless headsets and speakerphones to enhance the Unified Communications experience, helping to ensure a continuous flow of information.

The human voice is still at the heart of all Unified Communications systems. It's the swiftest and most effective way of delivering and receiving important information. A Sennheiser headset for Unified Communications is designed to work seamlessly with major UC platforms and completes the solution with the best possible sound for both user and listener – ensuring messages always gets across clearly.

Our Strategic Alliances

Sennheiser works with strategic alliance partners to ensure our headsets and speakerphones are easy to deploy and are fully compatible with all major Unified Communications platforms and desk phones. Our headsets are designed to maximize the performance of your chosen communications solution by always delivering the ultimate in sound and design quality and productivity enhancing features.

Sennheiser headsets and speakerphones are thoroughly tested with our partners for compatibility and optimal acoustic performance. Based on the test results, our products are certified by our partners.

For more information please see www.sennheiser.com/cco

Choose the right

How will you use your headset?

Desk

Not required to answer calls away from the workstation.

Office

A need to be able to handle calls while away from the desk, although, on most occasions, conversations take place at the workstation.

Field

On the road, in a hotel, or the countless other places with no dedicated workspace.

What devices do you use?

You need your devices to work seamlessly with your headset. It's really that simple. Sennheiser headsets are designed to cover every possibility – check our headset compatibility guide at: www.sennheiser.com/headsetcompatibility.

Softphone/PC

Connection via USB cable or USB dongle (Bluetooth) to Microsoft Windows or Apple Mac OS

Desk phone

Connection via multiple types of cables

Mobile phone

Connection via Bluetooth or 3.5 mm jack cable

Tablet

Connection via Bluetooth, 3.5 mm jack cable or USB depending on tablet.

Headset

How noisy is your workplace?

In challenging environments, such as contact centers or open-plan offices, the choice of headset should be based as much on the quality of the microphone's noise cancelling capabilities as its ability to let you hear your caller clearly. Voice clarity for your listener is an often overlooked consideration.

Low noise environment

Omni-directional microphone

Medium noise environment

Noise-cancelling microphone

High noise environment

Ultra noise-cancelling microphone

Single or double-sided?

Single-sided

Ideal for situations where you need to hear the caller clearly, and pay attention to what's going on around you.

Double-sided

Delivers calls in quality sound while reducing background noise – ideal for contact centers, where the need is to focus solely on the caller.

Unified Communications

UC optimized

Products with this icon are optimized for major UC and softphone brands.

Certified for Skype for Business

Products with this icon are certified for Skype for Business.

Try our Headsets

Try & Buy Program

The best way to experience Sennheiser's legendary sound is to hear it in your own call center environment. This program is limited to call centers with 50 or more headset users on location. Trial customers must have purchasing capabilities of 25 or more headsets on next order. You will have 2 weeks to evaluate your Sennheiser headset of choice. At the end of two weeks you will have the option to purchase the headset on site through your current vendor or to return it to Sennheiser.

www.sennheiser.com/tryyourheadsets

Headset advantages

Ergonomy

For those who spend many hours of a normal working day spent in front of a computer screen talking to customers on the phone, it's vital to sit correctly. A headset solution allows an ergonomically correct position to be maintained, reducing the back and neck aches associated with improper phone posture.

Productivity

With both hands free, it's easier to work efficiently. Typing and other tasks can be performed with confidence while maintaining contact with the caller – making it possible to effectively do two jobs at the same time.

Mobility

Wireless headsets remove limitations of movement created by headset or phone cables. Take conversations with you as you move around the office – on the road with a Bluetooth® headset.

Sennheiser Voice Clarity

The natural listening experience

For the best possible communication between caller and listener, Sennheiser Voice Clarity uniquely enhances the most important frequencies and details of the human voice. For callers, the sound is crisper and clearer, allowing them to hear the nuances contained in spoken conversation; for listeners, a noise-cancelling microphone sends the clearest signal to improve speech intelligibility. In combination, this results in better, more natural sounding conversations with no important details lost.

Voice Clarity

ActiveGard® Technology

Hearing protection

During the course of a day, headset users may be exposed to infrequent, but hazardous incoming noises. Technically referred to as a sound burst, this phenomenon can potentially cause long-lasting damage to the human ear. To safeguard users, all Sennheiser headsets for contact center and office environments are equipped with the innovative ActiveGard® technology.

Play sound without
ActiveGard®

Play sound with
ActiveGard®

Please be warned that the sound without ActiveGard® can be extremely high.
We recommend the volume should be set low when playing.

Sennheiser Wireless DECT Headset Solutions

Experience the quality of freedom

For busy professionals, the advantages of a wireless headset solution are obvious: users are no longer tied to their desks and conversations on the go keep businesses moving. The ability to use both hands for other tasks and to answer calls when away from a desk can also boost job satisfaction and help to create a more fulfilling working environment, while improving a company's overall efficiency.

A Sennheiser DECT solution offers a wide range of wearing styles to suit all individual preferences and work situations. Designed for maximum comfort, they are ideal for fatigue-free, all-day use in a wide variety of office environments. DECT protected frequency band that doesn't interface with WiFi networks enabling a greater number of headset users.

Software for Headsets and Speakerphones

Sennheiser PC software

Available at no cost, our PC software adds value to your Sennheiser products. The software includes call control applications, enabling connection between headset and UC client, as well as Sennheiser Updater, which facilitates fast and easy updates of products.

Take control of your call

The simple-to-install Sennheiser call control software, HeadSetup, combined with specific softphone plugins ensures that your Sennheiser headsets always work at peak efficiency with your chosen softphone platforms. Once plugged in, you can make full use of all call control functions and experience exceptional Sennheiser sound.

Always up to date

Fast and easy to use, Sennheiser Updater saves time on mass deployment of headset software and reduces headset maintenance in your organization.

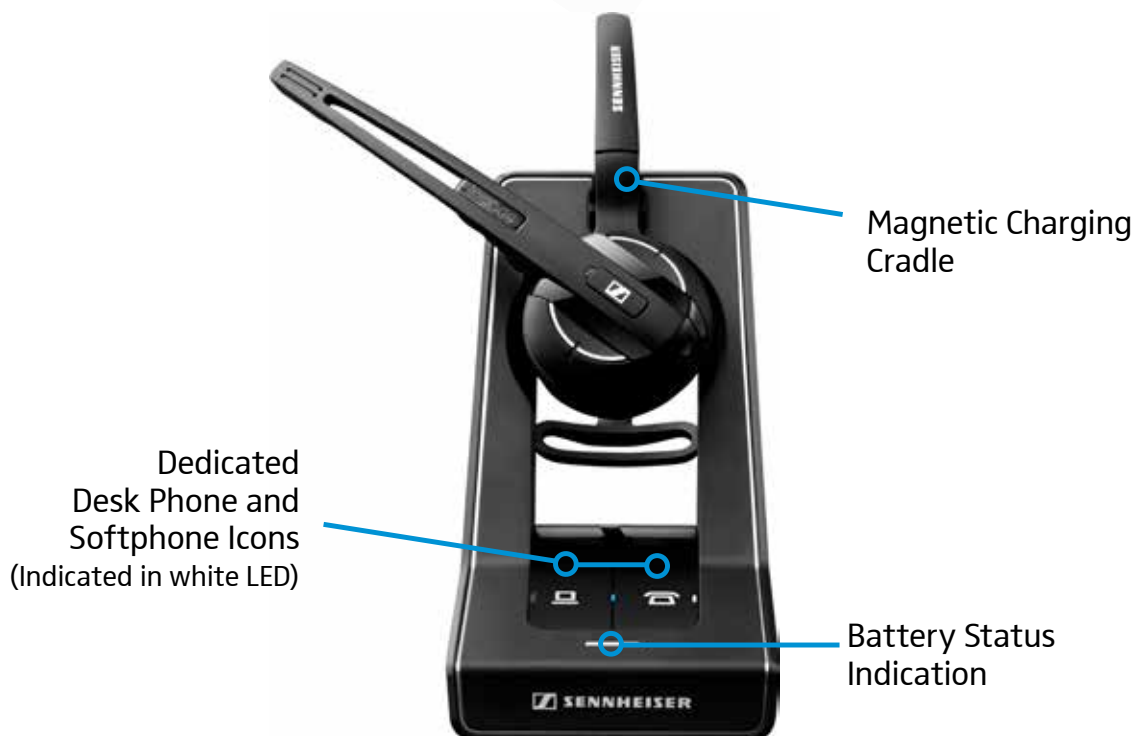

Keeping Sennheiser products compliant with the latest software version has never been simpler. For more information on PC software, please visit our website at www.sennheiser.com/ccs/software

For more information on PC software, please visit our website at www.sennheiser.com/ccs/software

SD Wireless DECT Series

When business demands the best performance

With superb sound and comfortable to wear, Sennheiser wireless DECT headsets are the perfect addition to your contact center and office phones. Hands remain free and calls are made in comfort from anywhere in the office.

Sennheiser Wireless Bluetooth® Headset Solutions

Experience the quality of freedom

Whether working on the move, out in the field, at home or abroad, Sennheiser Wireless Bluetooth® headsets and accessories are sleek, smart and easy to use. Equipped with the latest technology, these ideal communication companions are designed for busy professionals and business travelers who value the perfect blend of high quality sound and speech, day in and day out.

Bluetooth is a hands-free, wireless technology that allows a user to connect a Bluetooth-enabled headset to a mobile phone, laptop or other portable Bluetooth-ready devices,

allowing those devices to communicate directly and securely within closed networks. The benefits of Bluetooth are numerous and span multiple performance categories, including convenience, compatibility and efficiency.

Whether in the office or on the road, you will be able to easily keep in touch with customers and colleagues around the world with our Bluetooth headsets. For ultimate comfort, choose between different wearing styles – ear sleeve, ear hook, headband or a combination of those options.

Room Experience™ Technology

A relaxed listening experience

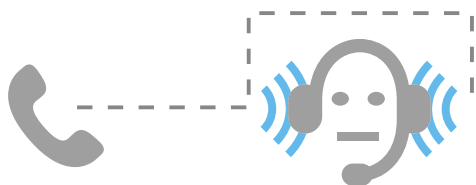

The evolution of our ongoing quest for even better acoustic quality, Sennheiser has created a unique new method of managing headset sound on calls. We call it Sennheiser Room Experience and it's designed to reduce listener fatigue for all-day users. By externalizing the sound from the head, Room Experience™ creates the impression of having a conversation with a person in the same room. This more realistic sound gives you a more natural and comfortable listening experience with less stress in noisy environments.

MB Pro Series

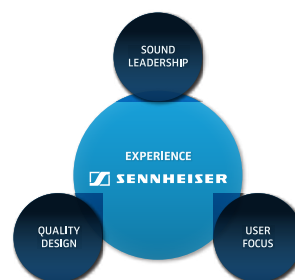

The MB Pro Series is the first product range to incorporate the Sennheiser Room Experience technology in MB Pro 2 headsets. This ground-breaking new feature can be easily and quickly activated and de-activated as the user requires.

MB Pro Series

Brilliant sound, exceptional comfort

Sennheiser's MB Pro Series offers premium wireless Bluetooth headsets for business professionals on the move who demand high quality audio at both ends of the conversation – and exceptional wearing comfort. The MB Pro Series is the first to feature Sennheiser Room Experience™*, which reduces listener fatigue for

all-day users by simulating the experience of having a conversation with a person in the same room. This realistic sound makes conversations seem more natural and comfortable, reducing stress in noisy environments.

Finding the perfect sound balance on the move

The PRESENCE™ headset automatically adapts to environmental differences to deliver the best sound possible with the help of SpeakFocus™ and WindSafe™ technologies.

SpeakFocus™ Technology

You never know when that important call will come. Be confident that no matter where you are – on the road, on the street or in the check-in queue, your voice can be heard clearly and consistently. Speak-Focus technology

focuses on your voice to deliver a crystal clear sound that enhances speech intelligibility for your listeners.

The unique 3 digital microphone system in the PRESENCE headset focuses on the target sound – your voice – to deliver a calm, steady sound profile, making it easier for listeners to recognize every single spoken word.

SpeakFocus technology ensures that your listener receives all the important details of your call to reduce misunderstandings – without regard to where the call is originated. The technology zooms in on your voice, works in all sound environments and adapts intelligently in all settings.

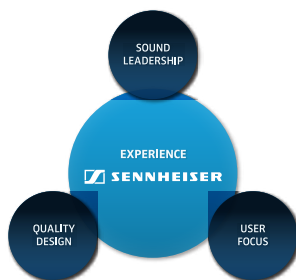

WindSafe™ Technology

Wind noise can make it hard to hear what people are saying on the phone. The problem most often originates with the sender, rather than the receiver. Even the best microphones can suffer during windy conditions,

making sound and voices indistinct and difficult to understand. With WindSafe™ technology, you can be sure listeners won't be troubled by wind noise and messages get through in even the breeziest settings.

WindSafe technology reduces wind noise to ensure the clearest possible sound is sent to your listener. By choosing the best mix of three microphones and processing the sound, WindSafe technology finds the best way to balance and enhance the user's voice when speaking outside in windy conditions.

Sennheiser Wired Headset Solutions

The simple and secure solution

A wired headset solution is a good fit for desk-centric users, who perform most daily tasks at a workstation. Products in the Sennheiser portfolio of wired headsets are ideal for contact centers, offices and Unified Communications professionals – who tend to work from one location.

No density limits

A wired headset solution has no limitation on the number of users in a given space, and can safely be used alongside DECT and Bluetooth solutions without causing interference issues. Resistant to being intercepted, wired headsets are an inherently secure solution. Simple to use, with no battery or charging, a wired solution is as easy as it gets, with plug-and-play connectivity.

Safe, clear and comfortable for all phone types

All wired headsets feature Sennheiser Activegard technology to protect users from acoustic injury and Sennheiser Voice Clarity for a more natural and relaxed listening experience. Sennheiser wired headsets are designed to be compatible with all traditional desk phones and soft-phones. The wide range of wearing styles and ear pads make it simple to find a headset that can be worn comfortably for an entire shift and beyond.

Culture™ Series

Everybody deserves Sennheiser sound

The Sennheiser Culture™ Series headsets are specially designed as a deployment-friendly solution for enterprises transitioning from traditional telephony systems to Unified Communications.

All Culture™ headsets offer Sennheiser Voice Clarity for a more natural listening experience and quality sound. Combine this with its lightweight design and comfort enhancing details for an experience you'll appreciate immediately.

- ActiveGard® technology protects against acoustical shock
- Ultra noise cancelling microphone
- Adjustable headband for a personalized fit
- Call control unit answer/end calls, control volume, redial and reject incoming calls
- Certified for Skype for Business
- Unique magnetic holder for inline call control box
- 90 degree tunable speaker housing for storage or travel
- 3 year warranty

SH Series

The true classic

If you value reliability, comfort and superb speech definition in any professional situation, our robust, all-purpose, SH Series headsets are ideal for longer conversations. Whether you're working in a contact center or at the reception desk of a large corporate office, the sound quality is so high you'll never have to raise your voice to be heard on the phone – and you'll make all your calls in comfort.

SH 230 / SH 230 IP

- Single-sided wearing style
- Easy Disconnect
- Omni-directional microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 500222 (SH 230)
Art. no. 504012 (SH 230 IP)

SH 250

- Double-sided wearing style
- Easy Disconnect
- Omni-directional microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 500223 (SH 250)

SH 330 / SH 330 IP

- Single-sided wearing style
- Easy Disconnect
- Supplied with large ear pad
- Noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 005354 (SH 330)
Art. no. 504013 (SH 330 IP)

SH 350 / SH 350 IP

- Double-sided wearing style
- Easy Disconnect
- Supplied with large ear pads
- Noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 005356 (SH 350)
Art. no. 504014 (SH 350 IP)

MB 50**

The MB 50 is a wired headset for business professionals using the mobile phone as primary communication tool demanding same sound experience and high performance on-the-go as in the office.

- Single-sided wearing style
- Noise-cancelling microphone
- Convenient call control for easy take/end of calls
- Compatible with latest smartphones of major mobile phone brands
- 2 year warranty

Art. no. 506097

* Please check headset compatibility guide for further information.

** IP variants – optimized for wideband sound

CC Series

For maximum productivity

Working in a busy contact center or a noisy, open office, you need a headset that delivers premium quality sound, and that's comfortable to wear all day. CC wired Series delivers powerful, accurate sound for excellent speech comprehension.

The ultra noise-cancelling microphone filters out background noise keeping your voice clear, so you'll be able to talk to your customers without raising your voice – and without disturbing your colleagues. Its durable construction makes it perfect for any type of office or professional communication.

CC 510**

- Single-sided wearing style
- Easy Disconnect
- Ultra noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 005357

CC 515 / CC 515 IP**

- Single-sided wearing style
- Easy Disconnect
- Supplied with large ear pads
- Ultra noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 500215 (CC 515)
Art. no. 504015 (CC 515 IP)

CC 520 / CC 520 IP**

- Double-sided wearing style
- Easy Disconnect
- Ultra noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 005358 (CC 520)
Art. no. 504016 (CC 520 IP)

CC 540**

- Double-sided wearing style
- Easy Disconnect
- Ultra noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 005360

CC 550 / CC 550 IP**

- Double-sided wearing style
- Easy Disconnect
- Supplied with large ear pads
- Ultra noise-cancelling microphone
- Bottom cable not included*
- 2 year warranty

Art. no. 005361 (CC 550)

Art. no. 504579

Art. no. 504578

CH 20 MB USB

– Headset charger cable for MB Pro Series

- CH 20 MB USB headset charger (without stand) for Mobile Business Pro Series is designed as an alternative to base station charging.
- Flexible usage due to compact size

MCH 7 – Multi-USB power source for CH 10 and CH 20

- Multi-USB power source
- Powers up to 7 Sennheiser CH 10 and CH 20 headset chargers simultaneously
- Charging time: 3 hours
- Works with the Sennheiser power supply: UNI PS US 01 (Art. no. 92893)

BTD 800 USB

– USB dongle for MB Pro and PRESENCE™ Series

- BTD 800 USB is a small USB dongle for Bluetooth® telecommunication with Unified Communications platforms like Cisco, Avaya and IBM Sametime
- Without requiring any technical installation, the dongle provides your computer with a Bluetooth® connection to a PRESENCE™ or MB Pro headset.
- Sennheiser Voice Clarity – wideband sound for a natural listening experience
- High quality audio mode (A2DP) for enhanced listening to music
- Small size dongle – easy to carry in your pocket and stays discretely plugged in to the PC

BTD 800 USB ML

– USB dongle for MB Pro and PRESENCE™ Series

- BTD 800 USB ML is a small dongle for Bluetooth® telecommunication with Skype for Business.
- Without requiring any technical installation, the dongle provides your computer with a Bluetooth® connection to a PRESENCE™ or MB Pro headset.
- Sennheiser Voice Clarity – wideband sound for a natural listening experience
- High quality audio mode (A2DP) for enhanced listening to music
- Small size dongle – easy to carry in your pocket and stays discretely plugged in to the PC

Accessories

Wireless headsets

HSL – Mechanical handset lifter

- Completes the wireless package when used with a Sennheiser wireless headset solution
- Enables you to conveniently answer calls and hang up again while away from your desk

EHS solutions for desk phones

EHS (Electronic Hook Switch) is used together with wireless DECT headsets to give you the ability to answer and end calls while you are away from your desk.

EHS solutions are available for all major phone manufacturers, including Cisco, Avaya, Alcatel-Lucent, Polycom, Aastra, ShoreTel and SNOM. Please check the individual phone's possibilities for EHS at the Headset Compatibility Guide at www.sennheiser.com/headsetcompatibility

While EHS was intended for desk phones, it is also possible to connect your mobile phone to the DECT base stations instead of a desk phone. In this case, use CEHS-MB 01

CH 10 – Headset charger stand for SD Series

- Designed for desk sharing or shift work environments such as emergency centers or contact centers
- Charging time: Only 1½ hours with dedicated external power supply or 3 hours when connected to Sennheiser MCH 7 multi-USB power source
- Multiple mounting options: stand alone, cascaded or wall mounted, where space is limited
- Discreet and elegant in design, Sennheiser CH 10 matches the SD Series' modern style

CH 10 USB – Headset charger cable for SD Series

- Charges the SD Series' headsets directly without a charger stand to save even more space
- Flexible usage due to compact size

CH 20 MB – Headset charger stand for MB Pro Series

- CH 20 MB headset charger (with stand) for Mobile Business Pro Series is designed as an alternative to base station charging.
- Especially suitable for desk sharing or shift work environments such as emergency centers or contact centers.
- Charging time: 1½ hours with dedicated external power supply or 3 hours when connected to Sennheiser MCH 7 multi-USB power source

Wired headsets

Easy Disconnect bottom cables for desk phones

The bottom cables are phone cables for the adaptation of different microphone sensitivities. They ensure that users of wired headsets get the best and most comfortable Sennheiser sound quality experience when connected to a desk phone. Easy Disconnect (ED) allows you to use any wired Sennheiser headset with a variety of desk phones. For further details please visit: www.sennheiser.com/headsetcompatibility

USB ED 01:
Art. no. 506035

CMB 01 CTRL:
Art. no. 506090

Easy Disconnect bottom adapter cables for USB and mobile devices

Connect wired headsets with Easy Disconnect (ED) plug to a computer, smart phones or DECT handsets: USB-ED 01, UUSB 8, CBB 01, CMB 01 CTRL and CCEL 19x. Check the individual device connections at the Headset Compatibility Guide on www.sennheiser.com/headsetcompatibility

UI 770 – Phone/PC switch box

- Dynamic volume control keeps incoming calls at the same sound level and prevents sudden noises
- Sound clarity system reduces background noise and enhances the caller's voice
- Easy switching option between handset and headset as well as between phone and PC use
- UI 770 is compatible with wideband headsets*
- UI 760 is compatible with narrowband headsets

* UI 770 do not comply with the Noise at Work EU Directive for narrowband headsets. In case of narrowband headset used together with UI 770 we recommend to use an EU limiter adapter (EU limiter switched off in UI 770).

Art. no. 504534

Training cables

The Y cables with three Easy Disconnect sockets (ATC 01 and ATC 02) are placed between a bottom cable and two headsets.

The Y cable allows a trainer to supervise the trainee during customer calls. Additionally, the Y cable ATC 02 allows the trainer to mute the microphone at any given time.

ATC 01:
Art. no. 500106

ATC 02:
Art. no. 502175

Others

- Leatherette ear pads: HZP 34 +36 (size L) and HZP 35+37 (size M) for Century™ Series
- Leatherette ear pads: HZP 31 for Circle™ Series and Culture™ Series
- Foam ear pads: HZP 30 for Circle™ Series
- Foam ear pads: HZP 32 for Culture™ Series
- Fixation Kit 01 for call control unit: Suitable for Century™ Series (SC 630/660 USB ML and SC 630/660 USB CTRL)

Accessories

Security & Transport cases

Security Cable Lock

- Ensures that the speakerphone or headset remains where it was placed
- Reduces risk of theft
- Discrete small design takes minimum table space
- Quick and simple to set up
- Secures two devices simultaneously
- Choice of four fixing options
- K-Slot® compatible
- Audio performance of devices is unaffected

Art. no. 506491

Carry Case 02

– Protection while travelling or storing

- The Carry Case 02 is suitable for all Century™ Series, MB Pro Series and MB 50 headsets, but also fits existing SH Series and CC Series headsets.
- Attractive durable design with embossed Sennheiser logo and high quality materials
- Velcro fixed inlay holds headset in place for maximum protection
- Removable inlay gives more space if needed
- Separate zipped compartment for USB dongle, cables etc.
- Additional compartment with Velcro closure

Art. no. 506059

Pouch – Speakerphone Series

- Protection pouch for the Sennheiser Speakerphone Series
- Easy storage and protection of the speakerphone

Art. no. 506051

Carry Case – PRESENCE™ Series

- Protection case for the Sennheiser PRESENCE™ Series
- Easy storage and protection of the PRESENCE™ Mobile Series headset

Art. no. 504580

Carry bag/pouch – CB 01

- Suitable for Century™ Series, CC Series, SH Series, Circle™ Series, Culture™ Series and MB 50.

Art. no. 092818

Sennheiser Speakerphone Series

In addition to headsets you can choose speakerphones for your conference calls. Please see page 34.

Compatibility

Sennheiser Headset Compatibility Guide is a tool to help you find Sennheiser solutions (headsets and/or connectors) that works with your device(s).

Please visit:
www.sennheiser.com/headsetcompatibility

Warranty

All Sennheiser Communications headsets are covered by a 2-year international warranty for maximum peace of mind.

Glossary

Sound Quality

Sennheiser Voice Clarity uniquely enhances the most important frequencies and details of the human voice. For you, the resulting sound is crisper and clearer, allowing the often subtle nuances contained in spoken conversation to be recognized. For listeners, a noise-cancelling microphone sends the clearest signal to improve comprehension. In combination, this results in better, more natural sounding conversations where no important details are lost.

SpeakFocus™ technology ensures that your listener receives all the important details of your call to reduce misunderstandings – no matter where you are calling from. The technology zooms in on your voice, works in all sound environments and adapts intelligently in any environment, including in the car, –at the office, attending a seminar ... even the airport!

Room Experience™ technology reduces listener fatigue for all-day users. By externalizing the sound from your head, Room Experience™ creates the sensation of having a conversation with a person in the same room. This more realistic sound gives you a more natural and comfortable listening experience and reduces listener fatigue.

Wideband audio technology operates in the extended frequency range of 150 – 6800 Hz and offers higher quality speech transmission than narrowband. To be able to use wideband, all components of the communication line must support this standard (PPX, mobile network operator etc.).

Narrowband audio technology operates in the 300 – 3400 Hz frequency. Because many traditional desk phones only support these narrowband frequencies, we have a range of narrowband headsets, which derive the best performance available from this standard.

Noise-cancellation technology is incorporated in our microphones to reduce background noise, filter out disturbing ambient noise and enable crystal clear telephone conversations. On certain models in the range, we offer ultra-noise cancelling microphones, which are able to improve voice transmission in particularly noisy environments.

WindSafe™ technology reduces wind noise to ensure the clearest possible sound is sent to your listener. By choosing the best mix of three microphones and processing the sound, WindSafe technology finds the best way to balance and enhance the user's voice when speaking outside in windy conditions.

Low impedance desk phone/devices have reduced output, which means that the speaker volume is lower than most devices. Devices with low impedance output need a headset which compensates for the lower speaker output to ensure the same sound level as most devices.

Hearing Protection

ActiveGard® hearing protection technology protects users from the potential danger of acoustic injury from unexpected and sudden sound bursts on the line. ActiveGard is like a fast-acting intelligent volume control. If an incoming signal rises to a level that is harmful to hearing, it is instantly reduced to a lower, more comfortable level. When the sound level returns to normal, the volume returns to the original level.

Wireless technologies

Bluetooth® technology is a global radio transmission standard, which supports the application of a wide range of wireless electronic devices. The technology connects devices over a distance of up to 100 meters in line of sight, depending on the Bluetooth class and device.

DECT is an abbreviation for Digital European Cordless Telephony, a non-analog transmission standard for wireless telephony. DECT is primarily used for wireless voice transmission in office and contact center environments. DECT provides a cleaner, more stable sound and does not interfere with nearby Wi-Fi devices. In addition DECT protects voice calls with highly secured DECT authentication and encryption. Sennheiser’s Wireless DECT Series have a range up to 55 m (180 ft.) in typical office environments and up to 180 m (590 ft.) with line of sight.

DECT vs Bluetooth® – One of the chief advantages of a DECT solution is that it doesn’t interfere with 2.4 GHz Wi-Fi____33, whereas a Bluetooth solution uses the same frequency as Wi-Fi____33. This means that it is possible to have more users in the same area when a DECT solution is used. On the other hand, a Bluetooth headset gives more mobility as it can connect directly with the user’s mobile phone. This gives the user the advantage of being able to use it both in the office and on the go.

	DECT	Bluetooth®
Frequency	EU/Asia-Pacific: 1,8 GHz US/Canada: 1,9 GHz	2,4 GHz
Range	Typical office environment: 180 ft Line of sight: 590 ft	Typical office environment: Up to 82 ft* Line of sight: Up to 328 ft
Connectivity	Desk phone and/or PC via bottom cables to base station.	Mobile phone, tablet and/or PC (via dongle)

* device dependent

Unified Communications

UC Optimized means that headsets and speakerphones are compatible with major Unified Communications platforms and softphone brands. Unified Communications bring together an organization’s voice, text and video based communication under one unified solution. The primary advantage of a Unified Communications solution is: enhanced overall efficiency of a business through increased productivity and mobility, resulting in a positive return on investment.

Other

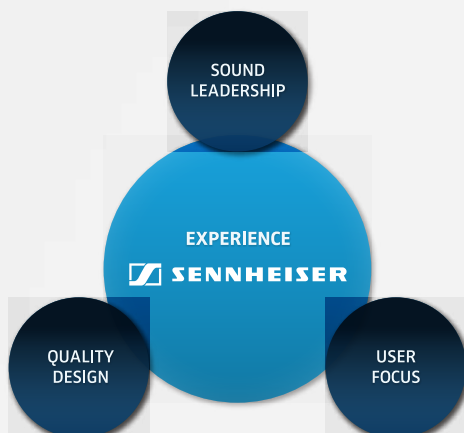

Easy Disconnect (ED) is a specialized plug connecting Sennheiser wired headsets to desk phones, DECT terminals and mobile phones via the correct bottom cable. Disconnect the headset from the bottom cable simply by pressing the ED plug. The spring loaded contacts in the ED plug ensure reliable connections in everyday use.

Experience Sennheiser

Perfection is always relative: Users have different expectations from their headsets and speakerphones depending on their needs. For professional users, that need is to communicate as effectively as possible.

With Sennheiser's range of headsets and speakerphones, the combination of Sennheiser sound leadership, quality design and build – and a focus on real life usability – give the best performance possible in offices, contact centers and Unified Communications environments.

Please visit us at: www.sennheiser.com/cco

Sennheiser is one of the world's leading manufacturers of headphones, microphones, wireless transmission systems and high-quality headsets for both business and entertainment.

Drawing on the electro acoustics expertise of Sennheiser and the leading hearing healthcare specialist William Demant, Sennheiser Communications' wireless and wired headsets and speakerphones for contact centers, offices and Unified Communications professionals are the result of Sennheiser's and William Demant's joint leadership in sound quality, design, wearing comfort and hearing protection.
