F5 Distributed Cloud Services

Shape and Volterra are now one integrated services portfolio. What has changed?

Westcon | **f5**

What has changed?

F5 Distributed Cloud Authentication Intelligence

(Formerly **Shape Recognize**)

Improve customer security and reduce friction
Increase topline digital revenue and improve customer experience by eliminating login friction for legitimate returning consumers.

F5 Distributed Cloud Account Protection

(Formerly **Shape AI Fraud Engine (SAFE)**)

Powerful artificial intelligence for online fraud protection
Distributed Cloud Account Protection blocks fraud missed by existing tools, slashes friction for legitimate consumers by up to 90% and reduces workloads for fraud teams.

F5 Distributed Cloud-Side Defense

(Formerly **Shape Client-Side Defense**)

Security monitoring and mitigation in the browser
Protect against Magecart, formjacking, skimming, PII harvesting, and other critical security vulnerabilities.

What has changed?

F5 Distributed Cloud Aggregator Management

(Formerly **Shape Aggregator Defense**)

Enabling financial institutions to secure customer experiences

Embrace open banking while managing aggregator and third-party provider (TPP) risk

F5 Distributed Cloud Bot Defense

(Formerly **Shape Integrated Bot Defense**)

Protect applications from malicious bots and unwanted automation attacks

Protect what's important: Secure your most valued assets, your applications, and sensitive data from bots, automated attacks, web scrapers, and exploits

F5 Distributed Cloud Bot Defense

(Formerly **Shape Enterprise Defense**)

What has changed?

F5 Distributed Cloud Mesh
(Formerly **VoltMesh**)

Seamlessly connect cloud platforms to provide a globally distributed load balancer, API gateway, and app security.

F5 Distributed Cloud App Stack
(Formerly **VoltStack**)

Deliver platform services to deploy, secure, and operate infrastructure plus apps across the edge, multiple clouds, and our global network.

F5 Distributed Cloud Console
(Formerly **VoltConsole**)

Manage all configurations such as software, infrastructure, applications, users, etc. Choose which services to expose in the console user interface.

Securely deliver apps across distributed cloud environments

F5 Distributed Cloud Services are SaaS-based security, networking, and application management services that enable customers to deploy, secure, and operate their applications in a cloud-native environment wherever needed–data center, multi-cloud, or the network or enterprise edge.

What are the benefits to Shape, Volterra and F5 Customers?

F5 Distributed Cloud Services allows Shape, Volterra, and F5 customers to continue to enjoy the same products and services, without the disparate collection of brands. This change will simplify the customer experience and will provide them with enhanced offerings from F5, the leader in software, security, and adaptive applications.
