

Be 5G-ready now

90%
reduction in network
energy usage

10-100x
improvement over 4G and
4.5G networks

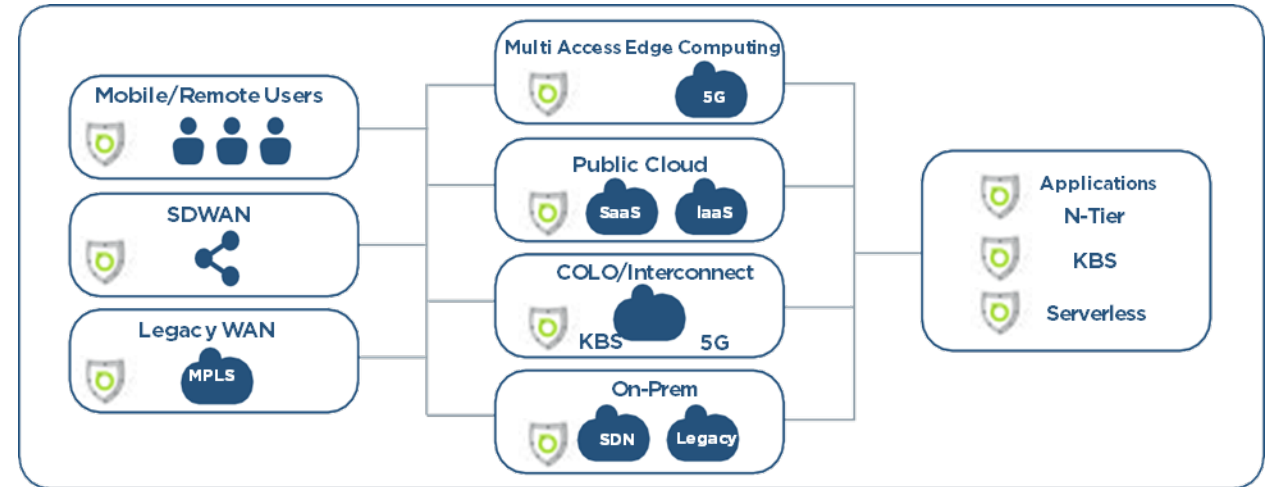

89%
of CIOs see 5G as a
requirement or something
they would like to
implement

132.8%
5G technology market
projected to grow to
\$320bn by 2026

The challenge

From digital transformation to IoT - the rapid adoption of **private 5G networks** introduces new security and technical challenges. NETSCOUT enables enterprises to be confident of their mission- and business critical applications and services - anytime, anywhere.

The solution

From planning, rollout and lifecycle of your Enterprise 5G network, NETSCOUT is **5G READY NOW**; their monitoring solutions support both 3GPP 5G non-standalone and 5G standalone environments. **Visibility Without Borders** allows enterprises to achieve the most pervasive, real-time, automatic monitoring capabilities for actionable insights. **Enterprises can receive actionable intelligence for a seamless service with security monitoring on 5G Enterprise networks, no matter where.**

The products

- nGeniusPULSE
- nGeniusOne
- NSA
- Smart Data

The advantage

- Leverage **NETSCOUT's decades of experience** in assuring the quality and integrity of **3G** and **4G/LTE** services for enterprises and private networks.
- Be 5G ready with a software-based, vendor agnostic monitoring solutions
- Actionable insights into reliability and latency for 5G networks
- **Pervasive monitoring** in real-time with actionable insights from anywhere, any cloud, with any application, in any infrastructure at **every phase of the 5G lifecycle**
