5-time honouree in Ethisphere's list of the "World's most ethical companies"

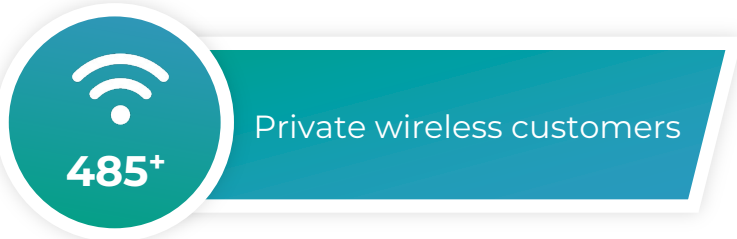

Together with our customers, we create the world's networks

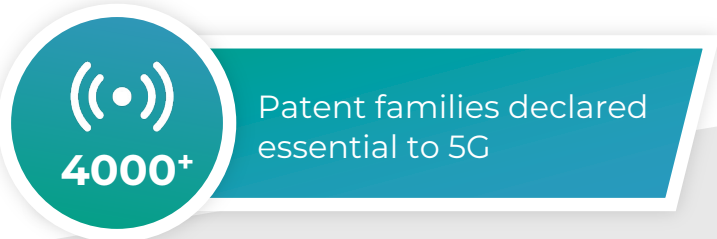

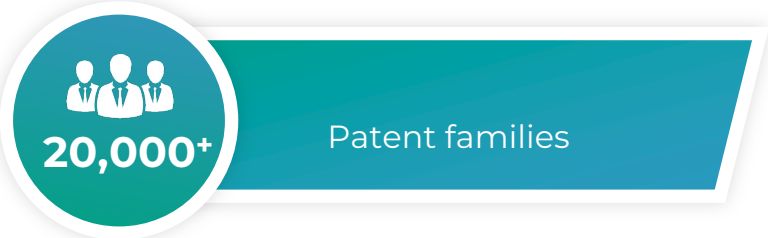

Communications service providers

Industry and public sector

Licensing opportunities

Are you ready to take advantage of an untapped market worth \$64bn?

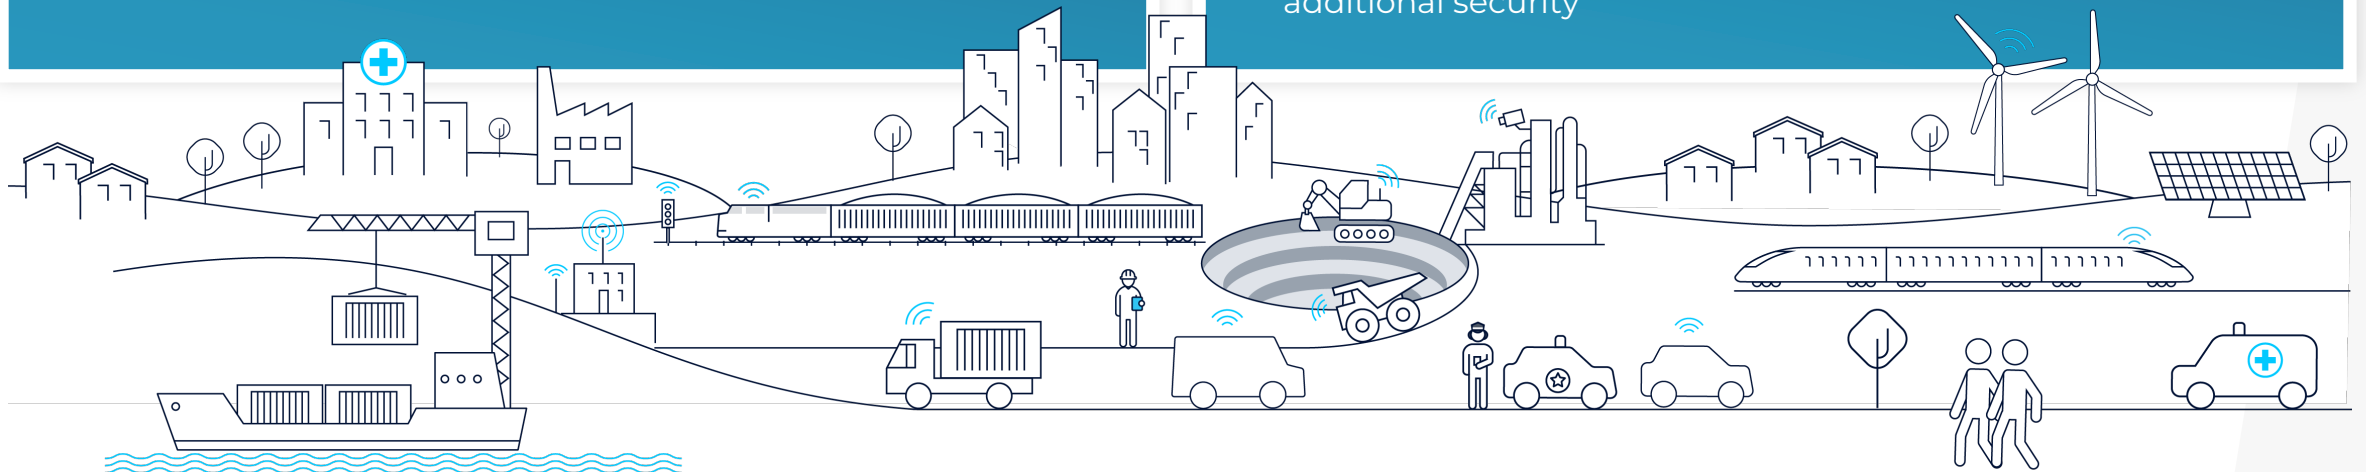

The private wireless market is set to explode over the next 10 years and Nokia is looking for specialist resellers like you to sell its proven technology to enterprise customers.

Partnering with Nokia puts you way ahead of the competition and positions you as the trusted expert along with Nokia who has been in this space for over 10 years.

In addition, we believe private wireless offers profitable business opportunities for your company through customer sales expansion opportunities, subscription revenues and selling your services.

What is a private wireless network?

A private wireless network is a standalone network based on cellular technology such as 4.9G/LTE and 5G, focused on operational assets and users. A private wireless network provides broadband connectivity like a public wireless network but is owned and controlled by the organization that built or purchased it. Placing micro towers, small cells, edge routers, and other infrastructure on-site allows enterprises to mimic a standard public cellular network, but with less congestion and more cost-effectiveness and additional security

Our new partnership with Nokia

As digital transformation accelerates, the need for connectivity is growing. From smartphones to smart factories, 5G offers the potential and performance for resource-intensive Big Data and IoT applications.

To bring you the benefits, especially of the 5G network, we, as Westcon-Comstor, have formed a partnership with Nokia. Together, we and Nokia provide the basic building blocks needed to realise the full potential of high-performance, end-to-end private wireless networks and overcome the challenges of local connectivity and Wi-Fi.

Why Nokia?

- Inventor of the world's first automated 4G/5G Network slicing solution
- World record holder for 5G speed
- Leader of key 5G patents
- Serving over 1300 customers and 150 private wireless networks in the networks in the industrial sector

We help you achieve 5G success

Are you interested in becoming a successful NOKIA Partner?

**Here's your path to success
in your business ...**

Break the ice and accelerate growth, together. A powerful connection.

Would you like to ...

- Uncover opportunities for your company through customer sales expansion opportunities, subscription revenues and selling your services?
- Have access to industry content and messaging to help drive customer conversations?
- Sell a proven technology from Nokia that has been used for nearly a decade in mobile networks and is now available and affordable for private networks?
- Be at the leading edge in offering breakthrough LTE & 5G solutions?

Nokia's private wireless is complimentary to your existing enterprise Wi-Fi & wireless networking business

Nokia and Westcon are here to actively support you on customer engagement through joint marketing, pre-sales support and co-selling efforts.

Join our ICEBREAKER Program – break the ice and accelerate growth, set out for new business opportunities with Westcon & Nokia!

ICEBREAKER

More Business

ICEBREAKER – the compass for your Nokia onboarding journey

The **ICEBREAKER Program** is an exclusive reseller program from Westcon that helps your company easily and profitably build and grow your business with NOKIA.

On a clearly defined path and accompanied by comprehensive information and support services, we will guide you to new business heights. Step by step, you will break the ice on the journey to climb important steps and be rewarded for your commitment and progress.

Once you have achieved the targets, Westcon will reward your company with \$500 for a team event of your choice, so you can celebrate the success.

For more information on the conditions of participation, please visit our website:

<https://www.westconcomstor.com/uk/en/vendors/nokia/icebreaker.html>

How does the ICEBREAKER Program work?

Our program is based on a simple, step-by-step path. The order of the individual steps is variable.

1. Onboarding

Registration

Register as a Westcon & Nokia partner and request your access to PartnerView, the 24x7 self-service portal for Westcon partners.

Meeting

Schedule a face-to-face appointment or video meeting with our BDM to get to know Westcon and ask your questions.

Newsletter

Sign up for both the Westcon and Nokia newsletters to get the latest, most relevant news for your business delivered straight to your inbox.

LinkedIn

Follow Westcon and Nokia on LinkedIn, get the latest news, promotions & events and share interesting posts with your network.

Registration

Register as partner at Nokia's Partner portal
