“

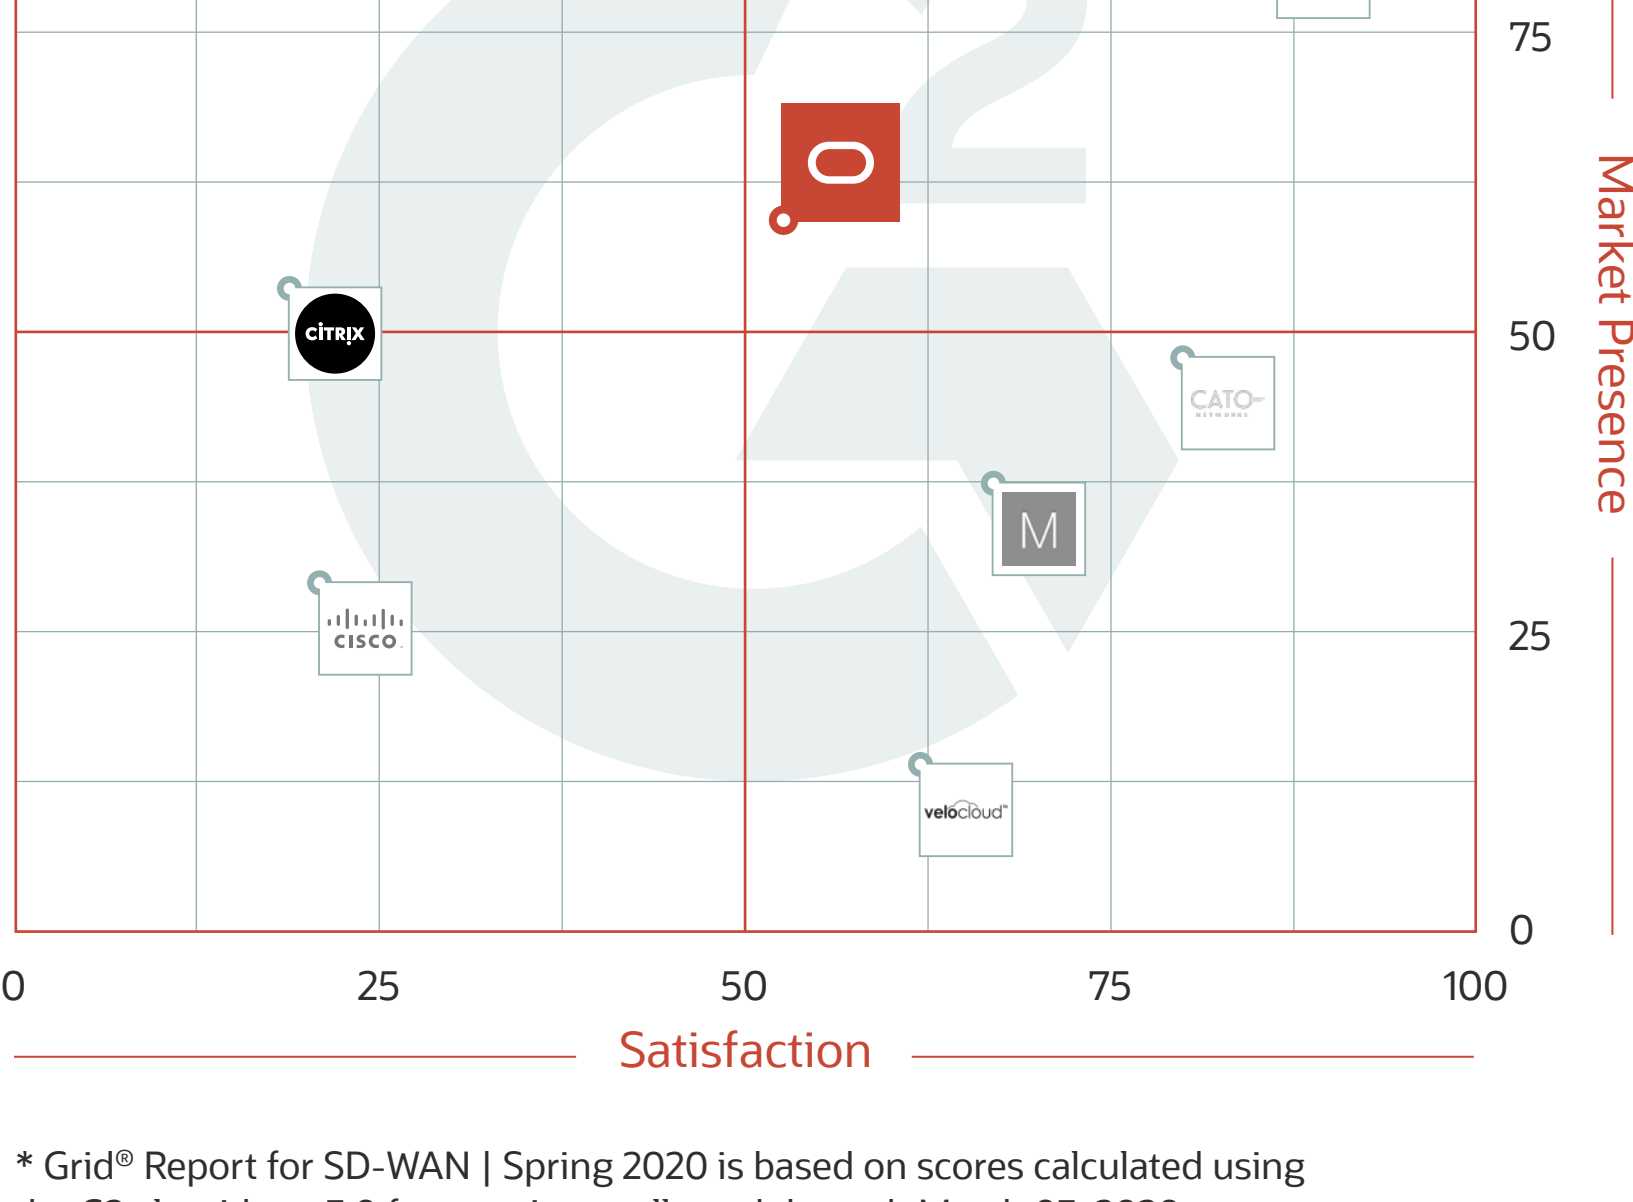

The product works really well and is easy to configure and manage, and the support is good. It has saved us more times than I can count when ISPs went down and it has allowed us to ditch expensive MPLS in favor of basic (less costly) internet pipes.

Grid® Report for SD-WAN

Spring 2020

* Grid® Report for SD-WAN | Spring 2020 is based on scores calculated using the G2 algorithm v3.0 from reviews collected through March 03, 2020.

“

Oracle SD-WAN is a very good, cost-effective solution. With [Oracle] SD-WAN we can have multiple links and use different links for different applications...

[Oracle] SD-WAN's Zero Touch Provisioning features helps us a lot. Unlike traditional networks where it takes weeks and months to spin up a new site, [Oracle] SD-WAN [makes] it very easy and we can light up a new [site] within a couple of days.

I like the consistency of the service my users can now expect. I run a huge amount of VoIP, and in the past, any sort of circuit outage or brownout caused major quality issues. That is all a thing of the past now. I get 99.99% excellent quality, regardless of what my WAN circuits are doing.

Oracle SD-WAN is easy to configure; we were able to get it up and running in almost 5-10 minutes.

Some of the features, like congestion control at source and monitoring the link both ways (upload/download), are unique in the SD-WAN market, which helps in delivering a quality experience.

	Oracle SD-WAN	Cisco SD-WAN	Category Average
Implementation Time (Avg. Months to Go Live)	3.4	5.8	-
Estimated ROI (Payback Period in Months)	15	34	21
Average User Adoption	73%	62%	71%

“

[Oracle] SD-WAN has provided us with a near-bulletproof layer of service reliability, which over the years has saved us tens if not hundreds of thousands of dollars in lost productivity, not to mention we have yet to miss an SLA since implementing Talari. Also, it is worth mentioning that we have a massive reduction in after-hours conference calls, long hours waiting on carriers to restore service, etc. Our work-life balance has never been better.
