

THE ALL-IN-ONE POLY STUDIO

EASY PLUG-AND-PLAY VIDEO CONFERENCING

ALL-IN-ONE USB-DEVICE:
6 MICS - 4K VIDEO CAMERA
- STEREO SPEAKERS

MEETING ROOMS

EVERYONE IS HEARD

The Poly Studio has 6 microphones built in. Four on the front and one on each side. With a range of 3.6 meters, everyone can be heard at a safe distance.

120° FIELD OF VIEW!

See everyone in the room while avoiding fisheye with its ultra-wide 120-degree field of view.

FEEL LIKE YOU'RE IN THE ROOM

The Poly Studio has high quality stereo speakers. This way, it's clear what everyone is saying. It feels like you're right in the middle of the discussion!

CRYSTAL CLEAR VIDEO

The camera on the Poly Studio has 4K resolution and 5x digital zoom. Thanks to the high resolution, the picture stays crystal clear when the camera zooms in on who's talking.

BUSY OFFICES

NOISEBLOCKAI

All meetings are filled with noise. Someone typing, eating a snack or shuffling papers. The built-in software NoiseBlockAI only picks up the voices in the room and blocks out everything else. No more distractions!

ACOUSTIC FENCE

Outside your meeting, there's a lot happening. Like other conversations in the next room. The Poly Studio creates a virtual "audio fence" around your meeting, and blocks sounds coming in.

PRESENTER TRACKING

Make sure the person talking is always in the center of the camera at all times with no delay. The Poly Studio follows you around the room while you are presenting. Great for whiteboard collaborative or educational sessions.

IN THE PICTURE

With group framing and automatic speaker tracking, the connection feels personal. And it's built right in, no drivers or software is needed on the PC. Smart panning and the unique split-screen conversation mode follow the flow of the conversation.

SIMPLE TO USE

COMPATIBLE

Poly Studio works with all major collaboration platforms, including Microsoft Teams, Skype for Business and Zoom.

PLUG & PLAY

The Poly Studio comes with a stand and can be placed on your desk, meeting room table, or be mounted on the wall. Then plug the USB cable to your laptop or PC and you are good to go! Optional adoption services available to assist in wide-scale deployments.

EASY TO MANAGE - AT NO ADDITIONAL COST

The Poly Studio combines everything in one device, and updates via the cloud. If you're using more than one device, you can manage them remotely with the management platform!

INVESTMENT PROTECTION

Comprehensive range of support services available globally to ensure your Poly Studio works optimally for years to come.

SPECIAL OFFER

Trade in your old video equipment for additional discount off your Poly Studio purchase. You can trade in video endpoints that were purchased at least 12 months ago including Polycom VSX and HDX and video endpoints from Cisco/Tandberg, Crestron, LifeSize, StarLeaf, Logitech, Sony, Aethra, Huawei, Radvision, VTEL, telyHD, Aver, Yamaha and Huddly.
