

Why Cisco Partner Experience Platform (PXP) with Comstor

Complete visibility across the lifecycle of all your Cisco business

What is PXP?

PXP is a tool that provides you with a comprehensive view of your opportunity across all the sales motions: service attach and renew, software renew and enterprise agreement penetration, and hardware refresh and last-day-of-support visibility.

How can we start helping you?

First step is to establish a "Cisco Click to View" relationship between us, this is an easy digital automated process with approval granted for a period of 12 months.

What are the extra benefits of PXP?

PXP helps you by identifying ways to maximize your rebates, by providing you with total visibility of uncovered equipment, product migration opportunities and how your performance compares to your peers.
