Why Bundle Telepresenz + RealWear?
Solve a Wide Range of Use Cases to Maximize ROI

What Is Telepresenz?

Telepresenz is a powerful collaboration app for front-line workers that runs on RealWear (and most other smart devices/glasses). It ensures you take full advantage of your hardware's capabilities and reduces the time it takes for your field/mobile team to get connected up and running.

Do I need Telepresenz if I have Teams, Zoom or Slack?

Slack, Microsoft Teams, and WhatsApp are great in the office, but not in the field. Telepresenz expands leading collaboration platform capabilities with easy-to-use features designed specifically for the mobile workforce. So you can increase remote and team productivity by 30%+.

Is Telepresenz right for my organization?

Fully Customizable. Customize your deployment to meet your organization's specific data capture, workflow, reporting, and IT/OT needs.

Easy Integration. Quickly integrate with your existing CMMS, EAM, PDM and ERP systems infrastructure.

Proven Technology. Meet compliance requirements and keep your communications secure with enterprise-grade encryption.

Light on Bandwidth. Useable on low bandwidth 3G/4G mobile/hotspot or satellite connections.

Quickly Invite Outside Experts. Simple and flexible invites for outside experts to join Telepresenz calls with just a click.

How much does it cost?

Telepresenz offers several plans to meet different business sizes and needs.

BASIC	$20/month per user

Great for small teams collaborating in the field.
Up to 240 minutes a month. All basic mobile meeting and remote assistance features

PRO	$50/month per user

For growing teams with high usage needs.
Up to 800 minutes a month. All basic mobile meeting and remote assistance features.

ENTERPRISE	variable

Ideal for larger organizations with safety and compliance needs.

Unlimited minutes per month plus additional enterprise features such as on–premise deployment, white labeling and digital workflows.

What are the benefits of bundling?

Out-of-the-box tools on RealWear are great to get started...but quickly become a limitation for organizations with mission-critical activities and complex, technical operations.

Telepresenz ensures a frictionless path towards fully realizing the benefits of a connected workforce that's enabled to solve critical problems in real time.

52% Less Site Visits   **76%** Faster Decisions   **20%** Less Downtime
