

# Effortless Security Assessments. Real Business Impact.

Turn quick assessments into lasting revenue.

Open doors, progress deals, and land services with repeatable, low friction security assessments designed for the way partners sell.

## Why partners choose this motion

**Fast, pointed insight that surfaces hidden gaps** - so you can validate solutions and move opportunities forward with confidence.

**Actionable next steps** - clear, customer ready recommendations that seed roadmaps, attach services, and set up expansion.

**Aligned to real world standards** - guidance that supports compliance narratives (e.g., GDPR/NIS2) without slowing the sale.

## How it works

### Scope

Pick the assessment and confirm light-touch access.

### Run

We execute quickly with minimal disruption.

### Activate

You leave with an executive read out, risk snapshot, and a practical action plan your account team can sell from.

## Cloud Security Health Check

Spot misconfigurations and vulnerabilities across cloud estates.

## DNS Security Assessment

Detect malicious lookups, data exfiltration and risky destinations.

## Data Security Posture Management (DSPM)

Find sensitive data, map exposure, and reduce blast radius.

## Rapid Risk Assessment O365

Reveal hidden email threats and people risk in Microsoft 365.

## Identity Security Risk Review

Tighten AD/Entra hygiene and close privilege based attack paths.

## External Attack Surface Assessment

See what adversaries see and fix exposed assets first.

## SaaS Security Health Check (SSPM)

Harden SaaS configs, access, and controls at scale.

## Security Control Baseline Health Check

Benchmark EDR/EPP, NGFW, email and more against best practice.

## Email Security Health Check

Expose phishing/BEC gaps and strengthen protection strategy.

## Web Application & API Health Check

Surface OWASP class risks and API abuse patterns.

And more...

## Outcomes you can sell

**For customers:** a clear, defensible snapshot of risk and what to fix first.

**For your business:** momentum in active deals, credible entry points for services, and a framework for follow on projects.
