

APC revolutionizes the UPS...again

Cutting-edge UPS technology from the inventors of Legendary Reliability.

What do you get when you combine 25 years of Legendary Reliability with the latest in UPS technology? Introducing the new APC Smart-UPS range of interactive, intuitive, and energy-saving UPSs, designed to protect critical server and network equipment from power threats and downtime.

New APC Smart-UPS: Smarter. Easier. Greener.

Thanks to millions of dollars in research, APC's latest Smart-UPS features a unique, new, battery life-expectancy predictor, indicating the exact month and year for battery replacement. Precision, temperature-compensated charging extends battery life; a special power meter function monitors energy usage; and a patent-pending 'green' mode boosts online efficiencies up to 99 percent, reducing utility costs. And now the interactive LCD can provide detailed status, configuration, and diagnostic information.

When every cost counts and performance is critical, insist on the more intelligent APC Smart-UPS. The name on the outside guarantees reliability on the inside.
