

Security

## Help Your Customers Scout Out Their Network!

Use one of our evaluation appliances to prove the effectiveness of the ForeScout CounterACT® solution, helping you close more opportunities. CounterACT is a security solution that delivers real-time visibility and control of all devices on the network, from the instant they connect. CounterACT is easy to deploy and manage because it requires no agents, no hardware upgrades, and no reconfigurations.

### A ForeScout CounterACT Evaluation Unit Provides Your Customers:

- (1) the unique ability to see all the devices on their network, including managed, unmanaged, and non-traditional devices;
- (2) a chance to enact granular policy-based control on these devices; and
- (3) experience orchestrating automated workflows to accelerate system-wide responses, making formerly disjointed security products work as one.

### In Our Inventory\*:

\*List reflects types of units owned by Westcon and does not guarantee availability at time of request.

CT-100	CT-1000	CT-2000**
