

**Stay safe, connected
and secure**

30-day evaluation licences covering gateway, management and endpoint solutions

In order to take advantage of this ability, Check Point sales reps and SEs can leverage Check Point's standard product evaluation resource on PartnerMap.

Special requests can also be made via an account team's sales leadership, Check Point's Support and Account Services teams and the Solution Centre.

All Check Point security gateways are equipped with Remote Access VPN capabilities that can be enabled to operate immediately by activating certain licences.

To improve the user experience, Check Point also provides different types and methods of access, from the clientless to client-based, remote-access VPN solutions, depending on the required level of access and types of applications in use.

Enabling a remote workforce

We've teamed up with Check Point and written a guide to help you with the challenges of converting an office-based workforce to a remote one.
