

**Stay safe, connected
and secure**

Westcon 

Secure your and your customers' networks with BloxOne Threat Defense Cloud service

In response to the need to have employees work from home, Infoblox wants to ensure our partners' and their customers' networks are protected.

Many of the cybersecurity technologies that work within enterprise facilities do not protect employees working from home. To help protect you and your customers we are extending BloxOne™ Threat Defense Advanced service free for 90 days. This offer is available to our partners and their customers. [Find out more](#)

Protect yourself and your customers

- BloxOne™ Threat Defense leverages the power of core network services to provide a foundational layer of security for on-prem, cloud and cloud-hybrid networks. Use it at this critical time to streamline and automate threat response and unleash the full power of your existing security stack.
- Detects and blocks phishing, exploits, ransomware and other modern malware that could compromise remote workers' devices, data and credentials.
- Prevents data exfiltration over DNS, keeping protected data safe.
- Uses a recent innovation to monitor for lookalike domains that could be on the rise and compromise valuable internet properties.
- Restricts user access to specific web content categories and helps track activity.
- Automates incident response so security ecosystems can remediate incidents quickly.
