Stay safe, connected and secure

Westcon

Helping remote workers stay safe and productive

We know that going to a 100% remote workforce overnight creates major business disruption. That's why we're reaching out to help. Right now, you have hundreds of new users working remote. Your VPN and data centre internet link were never intended to handle such a high volume of concurrent traffic.

We can give you a fast solution to handle congestion and ensure application QoE for your geographically dispersed workforce. That means your employees can access the applications they need to do their jobs – Skype, Teams, Salesforce, etc – and your VPN can support the traffic from remote workers without disruption.

Let our experts help you keep your remote workers connected

1. Get immediate results with fast, hands-free deployment

2. Ensure your workers have uninterrupted access to business applications

3. Control Shadow IT with enhanced visibility into VPN traffic

Find more about remote working in Infovista's blog or see their training and certification.

Helping critical workers stay connected

We know that going to a 100% remote workforce overnight creates major business disruption. That's why we're reaching out to help.

Right now, you have hundreds of new users working over a home internet connection that were rarely remote two months ago. Some of those remote workers represent job functions that are highly critical to business operations. How can you ensure they stay connected in the uncontrolled network environment of the home office?

Residential internet is subject to many vulnerabilities. Household internet traffic, residential overbooking, multiple on-net devices consuming bandwidth concurrently … all of these scenarios have the potential to disrupt the activities of your critical employees.

As part of our COVID-19 Response Program, we have developed a fast, easy-to-deploy solution to ensure resilience and application QoE for your mission critical workers, even with disruptions to their own internet connectivity.

Let our experts help you keep your remote workers connected

1. Get immediate results with fast, hands-free deployment

2. Ensure your critical workers have uninterrupted access

3. Control traffic on the VPN with advanced application intelligence
