Stay safe, connected and secure

Do your customers need a way to boost secure remote access capacity instantly?

Pulse Secure ICE (In Case of Emergency) can provide secure access anytime, anywhere, on any device. It is an optional licence that works with Pulse Connect Secure (PCS) to instantly accommodate spikes in remote access demand that may occur as a result of natural disasters and other public emergencies. [Find out more](#)

Instant boost to remote access deployed virtually with Pulse Secure Cares
If your customer has an immediate need to increase their remote access capacity, there's no need to wait for a Pulse Secure Appliance. Pulse Secure can provide you with a temporary, virtual version of your appliance. This is deployed via VMware and then, if you choose to transfer to a physical PSA, it's easy to export the config file and install it on the new appliance.
