That Matter

Multiply the power of Google Apps with the unified communications of the future

With native integration, Avaya Cloud Office is the perfect Add-On to transform Google's productivity powerhouse into the most complete collaborative communications platform of all.

We will empower your customers with an open, global, cloud-based communications and collaboration environment, empowering your workforce to work freely and flexibly across any device, anywhere, anytime, with our bundled VoIP calling, PBX, online fax, sms, video conferencing and much more without the need to switch between applications.

Access ACO with Google credentials

Make and receive high quality calls from Google Chrome

Access and speed dial all contacts from Gmail, Hangouts or Google Calendar

Import files from Google Drive to video calls, or to ACO chats

Send online faxes from Google Docs

Works on Chrome OS and all Chromebooks

Google Workspace

Schedule meetings from the "sidebar" add-on for Google Workspace (and manage permissions and roles in them)

That's why today's workforce is shifting to integrated solutions that combine email, calendaring, telephony and conferencing tools versus standalone applications and programmes to:

Simplify workflow

Maintain a unified business identity

Easily manage their scheduling and correspondence
