Stay safe, connected and secure

Westcon

AWS Solutions to enable a remote workforce

The COVID-19 virus has had a dramatic effect on how we live, work and play. Cash-flow constrained businesses need rapid solutions to support a remote workforce while maintaining customer relationships and efficient operations.

Below are key AWS IT solutions that encourage collaboration and communications for businesses that:

- Are quick to deploy with low support requirements and no up-front cost
- Provides 30/60/90 day targeted packages based on AWS free-tier and trial licensing to minimise cost over likely time frames of the virus impact
- That are pay-as-you-go with no lock-in's to avoid building in structural or ongoing costs to the customers' business

The solutions and services presented have cost optimisation, AWS Free Tier and trial licensing.

- Amazon WorkSpaces
- Amazon WorkDocs
- Amazon Chime
- Amazon Connect
- AWS Client VPN
- AWS Chatbot
