The Industry's Only Integrated CASB

Request your 60-day **free trial** today and see how Palo Alto Networks SaaS Security solution can help:

- **Automatically discover and control** new applications to keep pace with the SaaS explosion

- **Provide data protection and compliance** across all SaaS applications with the industry's first cloud-delivered enterprise DLP

- **Prevent zero-day threats in real time** with natively integrated ML-based attack prevention, without third-party security tools

- **Offer easy-to-deploy security with the lowest TCO** compared to legacy CASBs

Automate Protection Across All Apps, Networks and Users

SaaS app deployment in large enterprises grew a staggering 68% over four years, reaching an average of 129 apps per company.* We can help you stay ahead of this explosion with the industry's only integrated CASB designed to automate protections across all apps, networks and users.
